COMPANY

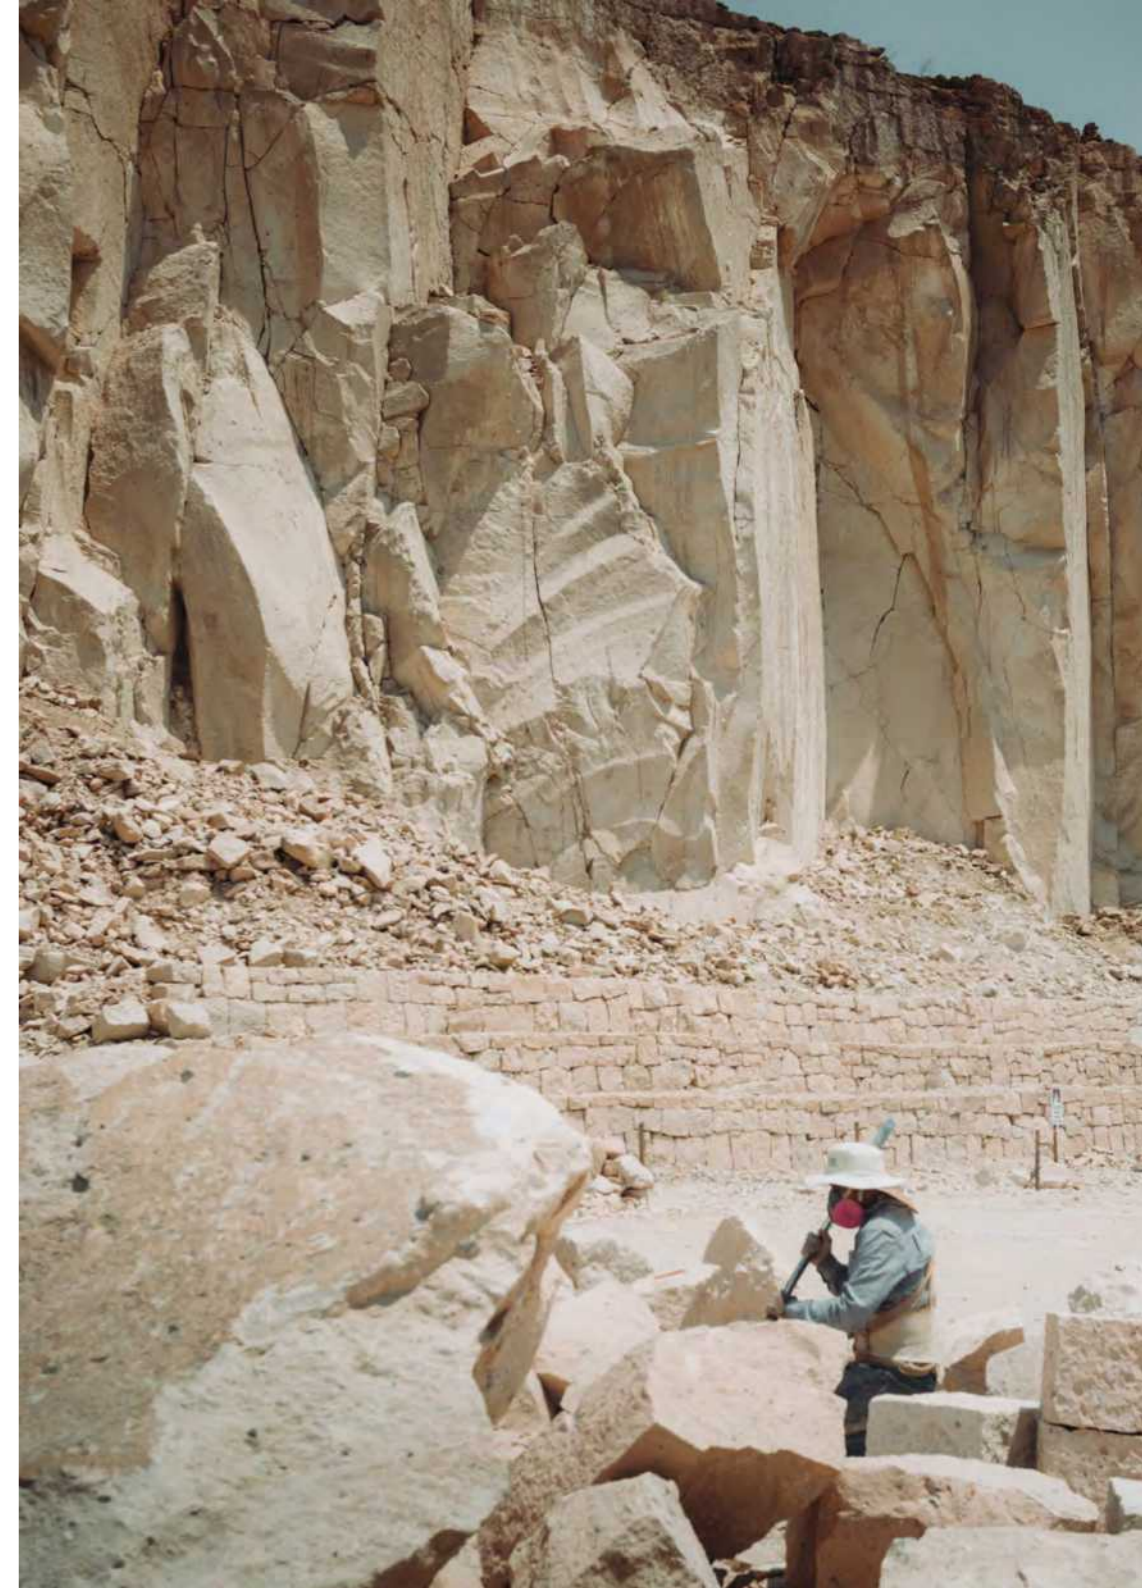

www.stonecompany.eu

About us

Ipek Natural Stone is dedicated to showcasing the exquisite beauty of Turkish natural stones, contributing to the economy, and introducing the rich diversity of our country's stones globally. Since 2014, we've prioritized quality service, customer satisfaction, and environmental responsibility.

Specializing in rock face stones and split face stones, both indoors and outdoors, we offer tiles and customizable free sizes to meet your design needs.

Experience the finest natural stones with Ipek Natural Stone, where we harmonize the beauty of nature with modern design, all while prioritizing your satisfaction.

Our Factory

Operating with a 10,000 m² open and 1,500 m² closed area, we use domestic machinery to maintain focus on quality and aesthetics.

Our company stands out in the industry for the processing and production of natural stones. From the extraction of stones to the entire production process, all processes are seamlessly managed in our modern and innovative facilities through integrated automation production technologies. Thanks to this infrastructure, we are able to offer high-quality and aesthetically pleasing products to our customers. Our global vision is designed to effectively market our products designed to meet the needs of professionals and businesses of various scales worldwide, and to globally promote Turkish natural stones. With our quality policy prioritizing customer satisfaction and our continuous improvement mindset, we are focused on maintaining and enhancing our position in the industry.

Order Process

Our company successfully engages in both national and international private and public projects, particularly collaborating with architecture offices and construction companies. As a result, our portfolio encompasses a range of special partnerships in Turkey and abroad. We meticulously manage the processes from preparing your orders to their delivery to you. Our top priorities include processing the unique beauty of natural stones to provide our customers with aesthetic, durable, and environmentally friendly products.

Our special stone products, when packaged in crates, weigh between 650-750 kilograms depending on the type of stone, with a capacity of 12 square meters per crate. Corner crates, on the other hand, stand out with corner numbers varying between 20-25, depending on their sizes. Loading up to 36 crates into a container, our capacity allows us to transport stones covering an area of 432 square meters and weighing up to 27,900 kilograms.

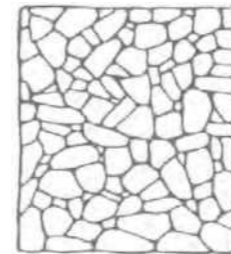

Silver Travertine

IPKR 5001

Silver Travertine, typically includes shades of gray, silver, and beige, bringing a modern and elegant atmosphere to spaces, while the veins and voids on its surface accentuate the characteristic features of travertine. Highlighting the sensory feast of nature, this stone stands out as a highly sought-after and special travertine product.

Black Marble

IPKR 5015

As a natural stone, black marble is not just a material; it is also a poetic expression of nature's artistic prowess. Its intense ink-like tone, reminiscent of the night sky, tells a tale of mystery and sophistication. Contrasting veins in different tones create intricate patterns, resembling brushstrokes on an artist's canvas.
